

L2-SERIES LOW VOLTAGE POWER CAPACITORS

Capacitor elements of metallized polypropylene film are self-healing and dry without impregnation liquid. Each capacitor element is individually protected with patented internal protection.

L2 design has

- smaller dimensions
- lower losses
- cable termination for one or two outputs
- internal discharge resistors

Capacitors are supplied with internal discharge resistors (3min. 75 V) and terminal boxes (IP42) or without terminal box (IP00).

Standard series, for 50 Hz or 60 Hz frequencies, are available for the following voltages: 220, 230, 240, 380, 400, 415, 440, 480, 525, 600, 660 and 690 V.

Other voltages up to 1000 V on request.

For power range $\leq 50 \text{ kvar}$ compact size, L1-series units also available (see other leaflet).
